- Eliminate forced upgrades yet preserve the flexibility to upgrade when you see clear ROI
- Fund innovation and drive business growth with savings of up to 90 percent of your total maintenance costs

Redirect Your Resources to Strategic Initiatives by Optimizing Support for Your Commerce Platform

Product Support Overview

Rimini Street replaces Oracle annual support for ATG Web Commerce. We can support your ATG Web Commerce framework by itself, or in combination with our support for your other enterprise applications like Oracle Retail and Siebel as well as your Oracle Database. Clients benefit by achieving higher value with premium support services and 50 percent savings compared to annual vendor support fees.

Business Challenges

The ATG Web Commerce products are very robust and continue to be placed into the leader's quadrant of the Gartner Magic Quadrant for Digital Commerce.¹ However, Oracle has continued to shift focus to its cloud commerce solutions, leading to longer-term questions about its commitment to supporting and enhancing ATG Web Commerce for existing customers. And the very nature of Oracle's customer-facing ATG Web Commerce platform requires a significant investment of support resources because it is typically heavily customized, requiring a level of support the software vendor does not provide as part of its standard support program.

The Rimini Street Solution

Rimini Street is focused on maximizing the lifespan and ROI of existing client software releases, guaranteeing support for at least 15 years with no required upgrades or migrations. Clients receive personalized service from a senior-level Primary Support Engineer (PSE) as well as a team of experts who focus on interoperability challenges, roadmap planning and holistic security. Support is available 24 hours a day, seven days a week, 365 days a year anywhere in the world with an average response time of less than five minutes for critical issues.

About Rimini Street

Rimini Street is a global provider of enterprise software products and services, and the leading independent support provider for Oracle and SAP products. The company has redefined enterprise support services since 2005 with an innovative, award-winning program that enables licensees of IBM, Microsoft, Oracle, SAP and other enterprise software vendors to save up to 90 percent on total support costs. Clients can remain on their current software release without any required upgrades for a minimum of 15 years. Over 1,300 global Fortune 500, midmarket, public sector and other organizations from a broad range of industries rely on Rimini Street as their trusted, independent support provider.

Support Details

Interoperability Support

Interoperability support services are offered as part of our standard support program, at no extra charge. Strategic guidance is provided to prepare you for potential infrastructure changes, as well as assistance with verifying certification on new platforms and resolving interoperability conflicts.

Security Advisory Services

Our team of security architects works with clients to assess current controls and provide vendor-neutral guidance to further reduce security risks by implementing the most relevant, current and business-aligned strategies to address the myriad of threats to IT systems. Our security experts are available to discuss both broad and specific security concerns and, as needed, will provide you with an actionable threat mitigation strategy.
