

Rimini Street Support for Oracle Retail

Featured Oracle Retail Products

Merchandising Operations Management (MOM), Merchandise Planning & Optimization, and Supply Chain Planning and Execution

Improve Your Oracle Support SLA and Increase Your ROI

Product Support Overview

Rimini Street replaces Oracle support and maintenance services for Oracle® Retail software. We can support your Oracle Retail software by itself, or in combination with our support for your Oracle enterprise applications and Oracle Database. Clients using our combined support receive an integrated service offering with all the advantages of single-provider support.

Business Challenges

Today's Oracle Retail systems are stable and reliable, requiring much less support than earlier generations of enterprise software. In this context, many customers today, frustrated by forced vendor upgrades and lackluster service levels, no longer believe that the high cost of Oracle annual support is a good value. These organizations prefer to extend the life of their current, stable Oracle Retail release, and many are reducing costs by replacing Oracle support with independent support from Rimini Street.

Key Benefits

- Extend the life and reduce the TCO of your investment
- Receive ultra-responsive support, including support for customizations at no extra charge
- Eliminate forced upgrades yet preserve the flexibility to upgrade when you see clear ROI
- Fund innovation and drive business growth with savings of up to 90 percent of your total maintenance costs

The Rimini Street Solution

Turning the multi-tiered vendor support model upside down, Rimini Street goes well beyond providing standard break/fix assistance. Each client receives personalized service from a senior-level Primary Support Engineer (PSE). In this way, clients have direct access to an expert with their first call. PSEs are available 24 hours a day, 7 days a week, 365 days a year anywhere in the world with an average response time of less than 5 minutes for critical issues. Clients benefit from software fixes, support for customized code and a team of experts who focus on interoperability challenges, roadmap planning and holistic security.

“Based on a survey I recently conducted, more than 88 percent of Oracle application licensees are interested in third-party support options that can provide meaningful savings and good service.”

R. “Ray” Wang,
Principal Analyst and Founder
Constellation Research, Inc.
