Supported Products

Rimini Street Database Health Check supports web-enabled versions of SAP, Oracle EBS, PeopleSoft, JD Edwards, Siebel and more.

The Rimini Street Advantage

- Deep application knowledge
- Accelerated engineering services
- Award-winning support
- Cost advantage

Delivering proactive database health assessment

Solution Overview

As the heart of your system, ERP applications depend on well-tuned databases. As companies extend application run time to maximize value, the proper tuning and configuration of their databases becomes increasingly important.

Any misconfigurations or performance issues at the database tier have a ripple effect into the application, with downtime costs ranging from thousands to millions of dollars. Slow-performing systems decrease end-user productivity and satisfaction. Additionally, database servers are often enormously over-provisioned, often running about 5 to 10 percent utilization.

Can you ensure your most critical databases are sized and configured correctly? Because database and hardware architectures evolve with complex application architectures and refreshes, keeping up imposes a heavy operational burden.

Rimini Street Database Health Check is a proactive tool that tracks and identifies when best practices are not followed, thereby mitigating situations before they negatively impact business operations.

Key Capabilities

Lightweight, Non-Intrusive Health Check Scripts

- Evaluate database health with or without a monitoring solution in place today.

Critical Diagnostic Considerations

- Considerations include: indexes, table fragmentation and I/O balance, parameter settings, database layout, transaction logging and other criteria.
- Supported platforms include: Microsoft SQL Server 2000 or greater and Oracle 8i or greater.

Customized Best Practice Recommendations

- Recommendations include expert guidance and ongoing support.
- Scripts are reviewed and securely run by your database administrators.
- Assessment tool produces a report identifying the magnitude of changes needed.

In today's user climate of "slow is the new broken," the Rimini Street Database Health Check tool offers your DBAs third-party analysis for the health your databases.

Key Benefits

Peace of mind: secondary validation benefits

- Perfect for all IT shops regardless of whether they have a team of senior DBAs, one junior DBA, or outsource the management of their database to a third party.
- Help avoid misconfigurations and over-provisioning.

Optimal performance, currently at no additional cost

- Best practices to help ensure healthy databases and a better support experience.
- Stand apart from commodity third-party support.

Easy to run, point-in-time assessment of your database health

- Multiplatform, universal tool available for your licensed Microsoft and Oracle database platforms.
- Increased predictability to improve DBA productivity and avoid disruptions.

Rimini Street Database Health Check supports the following databases:

- Microsoft SQL Server 2000 and greater.
- Oracle 8i and greater.

Why Rimini Street

We deliver unparalleled support because our people are highly-skilled engineers dedicated to ensuring that you receive exceptional value and customer service every day. Our premium third-party support services enable you to optimize existing enterprise software investments, extend current capabilities to leverage hybrid IT, and transform your business to a digital enterprise with help from intelligent and agile technology roadmaps.
