The Rimini Street Advantage

- Deep application knowledge
- Accelerated engineering services
- Award-winning support
- Cost advantage

88% of IT professionals say mobility is either a top or growing priority in their organization¹

Solution Overview

Rimini Street Mobility empowers you to rapidly mobile-enable your applications and extend critical, simplified workflows directly to your workforce. Our goal is to deliver more value to our clients and help ensure success in their digital transformation journey.

The solution provides a best-of-breed mobility framework that empowers you to rapidly mobile-enable your applications without the necessity of upgrading your organization's core ERP or CRM systems of record. In addition, the solution lowers risk and cost, and radically reduces the time enterprises need to spend mobilizing and modernizing their business processes.

The solution is offered as a subscription to Rimini Street clients across all supported product lines and is available with the same Primary Support Engineer model and industry-leading SLAs enjoyed by Rimini Street clients worldwide.

Business Challenges

Organizations realize they need to incorporate mobile technologies as part of their digital transformation efforts. However, most mobility solutions, including those of the large ERP vendors, often pose significant challenges. Users are frustrated with the shortcomings of mobile functionality in their existing software causing delays in workforce enablement and orchestration across their enterprises.

The average cost to develop a single mobile application can exceed \$250,000, and the average time to develop and launch a new app is six months.² Existing solutions require programming and create delays and roadblocks, while hazards abound in the areas of development, implementation, security and cost overruns.

Many mobility solutions do not free you from vendor lock-in — they only strengthen it — and typical mobile solutions involve customized code, which most software vendors do not support.

¹ IDC Research, "How Mobility Is Driving the Digital Transformation," 2017.

² Capriza, "Delivering Business Value with Digital Transformation, How mobility provides quick wins and business agility," 2017.

"Clients seek simple, affordable and streamlined mobility solutions that work securely across their enterprise application portfolio. The goal is cost-effective innovation and digital transformation."

About Rimini Street

Rimini Street is a global provider of enterprise software products and services, and the leading third-party support provider for Oracle and SAP products. The company has redefined enterprise support services since 2005 with an innovative, award-winning program that enables licensees of IBM, Microsoft, Oracle, SAP and other enterprise software vendors to save up to 90 percent on total support costs. Clients can remain on their current software release without any required upgrades for a minimum of 15 years. Global Fortune 500, midmarket, public sector and other organizations from a broad range of industries rely on Rimini Street as their trusted, third-party support provider.

Rimini Street Mobility

With Rimini Street Mobility, you can quickly create mobile experiences using your web-enabled ERP and CRM apps, providing a consistent look and feel across your organization while enjoying superior application support.

Rimini Street Mobility is ideal for organizations pursuing a hybrid IT strategy that caps investment in core systems of record and/or innovation through application modernization. With this simplified solution that mobile-enables apps with minimal business disruption, end-users can quickly get access to critical workflows at a fraction of the cost of traditional mobility platforms.

With Rimini Street Mobility, IT and lines of business can deliver micro apps for any device in a matter of days without coding, APIs or integration hassles. The solution works with packaged applications such as SAP, Oracle and Salesforce, as well as with custom-built applications, and includes award-winning support, 15-minute guaranteed response times for critical issues and deep application experience.

Key Features & Capabilities

- HTML5-based platform delivers simple, consistent UX across mobile devices
- Simple, consistent and real-time user experience
- Prebuilt library of mobile-optimized micro apps
- Ability to leverage existing systems, processes, skills and expertise
- Single sign-on (SSO) authentication
- Available as a cloud platform; multitenant architecture supported
- Secure, ISO-27001 certified cloud platform
- Mobilize any Web UI experience

Benefits

- **One-stop solution:** Mobile-enable your apps and get premium support from senior-level engineers.
- **Zero coding, zero APIs, zero upgrades:** Avoid business disruption and empower your users with rapid design and development of mobile micro applications
- **Minimal investment required:** Get started with no investment in hardware, infrastructure or development resources.
- **Less waiting:** Modernize your applications in weeks vs. months.
- **Security ensured:** No data stored on device, end-to-end security encryption, ISO-27001 certified cloud platform.
