

Client Success Story

Life Science & Industrial Filtration Leader Opts for Hybrid IT over S/4HANA

Pall Corporation

Client Profile: Pall Corporation provides high-tech fluid filtration, separation and purification solutions to diverse industrial and life sciences customers including the oil and gas, biopharmaceutical, medical, food and beverage industries.

Industry: Manufacturing

Geography: Headquartered in Port Washington, New York

Revenue: \$2.8 billion USD

Employees: 10,000

Products Supported: SAP ERP (ECC 6.0) EhP3; SAP Business Warehouse 7.0; SAP Governance, Risk and Compliance; IBM Db2

"What we found, first and foremost, as we evaluated the different tools and capabilities from SAP, is that we weren't getting a whole lot of value for our maintenance dollars. When we talked to SAP about S/4HANA, it was very expensive — we just didn't have the volume of transactions to warrant a business case for going to in-memory processing with HANA."

Paul Wilner
VP IT & CIO
Pall Corporation

Pall Corporation is a global leader in fluid filtration, separation and purification, and manufactures products for microelectronics production, breweries and more.

The Pall Corporation Challenge

Pall Corporation is a long-time SAP customer and currently runs SAP ERP (ECC 6.0) with Enhancement Pack 7, SAP Business Warehouse 7 and other SAP applications and technologies on the IBM Db2 platform. To compete in such a varied global marketplace, Pall Corporation's challenge was twofold: first, the company needed to reduce its operational spending to maximize profitability, and second, Pall Corporation needed to redefine its next-generation ERP strategy to better support its business initiatives.

"What we found, first and foremost, as we evaluated the different tools and capabilities from SAP, is that we weren't realizing value for our maintenance dollars for ERP or our Db2 database," says Paul Wilner, vice president of IT and CIO for Pall Corporation. "SAP didn't appear to be investing any further in the core ECC product and everything seemed to be invested in their cloud services, including S/4HANA."

In addition, Wilner says SAP's support services for Pall Corporation's ECC 6.0 application were lacking, "We didn't have premier-level maintenance services so we weren't a MaxAttention customer — if we wanted to get better service from SAP, it seemed clear that we would need to pay a higher maintenance fee, which made no sense to anybody in our organization," Wilner explains.

As Pall Corporation actively planned its SAP strategy, S/4HANA initially appeared to be the next logical step. However, Wilner notes, "When we talked to SAP about S/4HANA, it was too expensive with an unclear roadmap — we just weren't able to jointly develop a business case to justify going to in-memory processing with HANA."

Benefits

- **Avoided S/4HANA reimplementation:** Pall Corporation, by not following SAP's reimplementation path to a very early stage product, S/4HANA, saved significant time and money while becoming a more agile IT organization.
- **Gained premier-level support for SAP ECC 6.0:** Pall Corporation is receiving more responsive support, including support for custom code, at a much lower cost through independent support.
- **Delivered on business needs faster with hybrid IT strategy:** Pall Corporation has reinvested its support savings into implementing new cloud software applications around its core ECC 6.0.
- **Received global tax, legal and regulatory updates:** Pall Corporation now receives complimentary tailored tax, legal and regulatory patches for over 40 countries globally.

"For us, we no longer see SAP as the only solution, but as one of multiple options — and that's working well for us. By moving to Rimini Street, we saw an opportunity to save on maintenance, get a higher level of support and still reinvest our savings into maintaining our ECC core while adding cloud applications around it, without increasing operational spend."

The Rimini Street Solution

"With S/4HANA not a near-term viable option, we still needed to address the cost of support and maintenance through SAP as part of our strategy to reduce IT operational expenses," Wilner says. "While we have been happy with SAP's software offerings, including Cloud for Customer (C4C) and Success Factors, premium support service was the missing piece, and that's where Rimini Street came into the fray."

"The outside referrals for Rimini Street were all good, but it was our visit with the team that convinced us that we were on the right path," Wilner says. "When I took my team there, we were very prepared with questions and we uncovered everything we had come in looking to learn. Rimini Street did a great job of bringing their experts to the table, and we saw their culture firsthand."

In 2015, as it began planning an upgrade from SAP EhP 3 to EhP 7, Pall Corporation decided to make the switch to independent support.

"By moving to Rimini Street, we saw an opportunity to save on maintenance, get a higher level of support and still reinvest our savings in new solutions without increasing our operational spend," Wilner says. "At the same time, we stopped looking to SAP for every answer and realized that our best path forward was to maintain our ECC core and add cloud applications around it. Innovating around SAP was the most viable, cost-effective strategy."

Client Results

Shortly after moving to independent support, Pall Corporation prepared to upgrade to EhP 7. "As we neared our cutover date, we consulted with Rimini Street on the different upgrade scenarios," Wilner says. "We did several mock runs and, each time we ran into an issue, we collaborated with Rimini Street to evaluate and troubleshoot."

The upgrade went well. "We executed it faster than we expected and gave the system back to the business earlier than planned. Once in production, we ran into about a dozen incidents, all of which were resolved jointly with our Rimini Street Primary Support Engineer (PSE)," Wilner recalls.

More importantly, the shift to independent support funded the addition of new SaaS and cloud applications to the periphery of its core ECC 6.0 system as part of its hybrid IT strategy.

Pall Corporation has implemented SAP Cloud for Customer, SuccessFactors and Marketo for lead management. In addition, Pall has been evaluating other software offerings to innovate around its SAP ERP, including product information management solutions and eCommerce from both SAP & Intershop, and most recently revamped its website content management system.

"Our strategy is to do more project work that drives value for the business," Wilner says. "Having Rimini Street for support enables us to focus on where we want to go and what we want to do."
