## Consolidate Support Services and Maximize the Value of IT Investments

### Product Support Overview

Rimini Street offers maintenance services and support for Oracle® Fusion Middleware software by itself, or in combination with support for Oracle or SAP® enterprise applications and support for Oracle Database. Clients using combined third-party support receive an integrated service offering with all the advantages of single-provider support.

### Business Challenges

Oracle Fusion Middleware software systems are stable and reliable, requiring much less support than earlier generations. In this context, many licensees today are frustrated by forced vendor upgrades and lackluster service levels. Those achieving little value from their annual support contracts are choosing to extend the life of their current releases and dramatically reduce costs by replacing Oracle support with independent, third-party support.

### The Rimini Street Solution

Turning the multi-tiered vendor support model upside down, Rimini Street goes well beyond providing standard break/fix assistance. Each client receives personalized service from a senior-level Primary Support Engineer (PSE) for direct access to an expert with their first call. PSEs are available 24 hours a day, seven days a week, 365 days a year anywhere in the world with an average response time of less than five minutes for critical issues. Clients benefit from software fixes and a team of third-party support experts that focuses on interoperability challenges, roadmap planning and holistic security.

**Key Benefits**

- Extend the life and reduce the Total Cost of Ownership of IT investment
- Receive ultra-responsive support 24/7/365
- Eliminate forced upgrades yet preserve the flexibility to upgrade when there is clear ROI
- Fund innovation and drive business growth with savings of up to 90% on total maintenance costs
