Rimini Street Application Management Services for Oracle E-Business Suite

An Integrated Combination of Application Management and Support Services

Business Challenge

Oracle operational disruptions and challenges are on the rise. Companies may not possess enough skilled staff members or bandwidth to proactively manage their systems or take on additional projects or necessary integrations.

Upgrading is often not a compelling option and Oracle’s continuous updates model means weighing the trade-offs of disruptive upgrades versus applying bug fixes and necessary tax, legal, and regulatory updates that are critical to maintain compliance.

The key is to rebalance how time and money are spent to create more capacity, keep systems stable, and reduce the number of resources that need to be managed.

Solution Overview

Rimini Street Application Management Services (AMS) for Oracle E-Business Suite (EBS) complement existing Rimini Street support and deliver exceptional longevity and flexibility in maintaining, enhancing, and managing those applications.

The services are ideal for companies:

- In maintenance mode with limited resources, a scarcity of legacy EBS talent, and/or a growing backlog of IT projects
- Experiencing constant pressure from Oracle and AMS providers for upgrades or high-margin consulting services
- Burdened by growing queues of services requests and incidents
- Facing continuous updates and unnecessary costs, with no end in sight
Services
Rimini Street AMS for Oracle EBS require an active Rimini Street support agreement.

Benefits
The service includes an unlimited Service Requests and unlimited Incidents, with blocks of enhancement hours – all at a simple, annual subscription price.
