Subject: ADVISORY: Migration to SAP S/4HANA on RISE No Longer Required

Dear SAP Licensees –

SAP has set a 2027 deadline for ECC 6.0 migration to S/4HANA on RISE. Yet, tens of thousands of SAP licensees have not yet begun the project for a variety of reasons: low ROI, high cost, project magnitude, additional licensing, vendor “lock in” with RISE and outdated technology.

In addition, many industry experts believe with the rapid speed of technology innovation and advances in AI, **ERP software will be replaced in 5 to 10 Years** by new, faster and more flexible **agentic ERP processes** already being [successfully deployed](#) by leading organizations.

So why waste your money, time and labor completing an expensive, unnecessary SAP ERP migration to software and technology that is already outdated?

There is a BETTER option:

- **Extend** the life of your current SAP ERP ECC 6.0 or S/4HANA software with Rimini Support available through 2040
- **Save** up to 50% on your annual support fees for SAP software and avoid unnecessary and costly SAP ERP migrations
- **Invest** the savings in REAL innovation with new agentic ERP processes that integrate AI technology with and enhance the value of your existing SAP software
- **Deliver** IMMEDIATE value to your organization with implementation of agentic ERP processes in weeks – not years

Join thousands of other Fortune 500, mid-market, public sector and government clients globally using SAP, Oracle, VMware, Salesforce, Workday, ServiceNow and many other enterprise software products, who are working with Rimini Street to save more than \$9 billion dollars in IT operating costs and self-fund innovation within existing IT budgets.

To learn more about a SMARTER and FASTER path to IT savings and REAL innovation, [please click here](#) or call me at the number below. It would be my pleasure to be of service.

Regards,
