

Enterprise Business Process Optimization

Optimize business processes to enhance agility, insight and operational value

KEY BENEFITS

Operational efficiency and cost control

- › Streamline processes to reduce manual effort and errors.
- › Identify and eliminate waste through smarter workflows.
- › Accelerate month-end and year-end processes to improve responsiveness.

Strategic enablement and insights

- › Make better business decisions via real-time insights.
- › Empower your team to deliver value beyond transactions.
- › Enhance enterprise-wide decision-making through reliable, integrated data.

Scalability and risk management

- › Integrate systems for greater agility and scalability.
- › Standardize processes to support growth and complexity.
- › Stay ahead of regulatory demands with confidence.

By moving to Rimini Street, we redirected our attention and cost savings to new initiatives. Instead of being distracted by upgrades, we completed a major business transformation, added new inventory planning and forecasting software, and ensured our team and processes were ready for success.”

— CIO, Consumer electronics company

Unlocking strategic value: business process optimization for the Agentic AI Era

Businesses are under growing pressure to deliver strategic insights, reduce costs, and maintain compliance — all while managing fragmented systems, manual processes, and increasing complexity. These challenges often limit your ability to evolve into a proactive, data-driven function that supports enterprise agility and growth.

In many organizations, outdated workflows and limited visibility keep teams focused on transactional tasks rather than strategic enablement. Business process optimization is now essential for transforming operations — streamlining processes, improving data quality, and enabling faster, more informed decisions. Agentic AI can further accelerate these gains, but the foundation is built on optimized, well-aligned business processes.

The Rimini Street solution

Delivered via Rimini Consult, the Business Process Optimization offering helps organizations optimize business processes and technology while preparing for intelligent enterprise performance. Our experts identify high-value opportunities to improve data quality, reduce manual effort, and align workflows with business priorities.

Through a structured, vendor-agnostic engagement, we deliver a board-ready roadmap that empowers teams to support innovation, adopt new technologies, and achieve measurable outcomes.

90+ Processes Optimized

Rimini Consult helped USGBC identify over 90 ways to automate and digitize underused finance workflows — boosting efficiency, cutting manual effort, and saving costs.

What you get

Business process and alignment evaluation

Diagnostic of current processes, system capabilities, and alignment with business goals.

Inefficiency and feature analysis

Identification of performance gaps, manual workarounds, and underused system features.

Modernization options

Recommendations for optimizing existing functions and adopting composable strategies.

Prioritized improvement roadmap

Rationalized list of opportunities with a phased rollout plan.

Executive-ready recommendations

Clear, actionable summary with cost-benefit insights and next steps.

Our approach

Our Business Process Optimization offering is delivered through a structured, six-week engagement designed for clarity, speed, and strategic relevance, combining stakeholder workshops, data-driven analysis, and targeted planning to assess how business processes operate within your enterprise software and identify opportunities for improvement. We tailor recommendations to your organization’s unique environment, delivering a board-ready roadmap that supports enterprise goals and prepares business processes for future innovation, including AI and automation.

	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6
Phase 0: 30-minute Quick Check Confirm scope, resources, deliverables, and expectations to gain approval to proceed.	Phase 1: Project Definition Define scope and success criteria, finalize workshop logistics, and kick off the project.	Phase 2: Discovery Run stakeholder workshops to uncover pain points, manual processes, and future needs, and compile potential solutions.		Phase 3: Strategy & Roadmap Prioritize opportunities and define a phased rollout plan based on effort, dependencies, and business value.		Phase 4: Recommendations Deliver executive-ready recommendations and present a detailed implementation roadmap with timelines and estimates.

KEY FEATURES

- › **ERP-agnostic expertise**
Unbiased, strategic guidance
- › **Board-ready deliverables**
Recommendations designed for executive alignment and action
- › **Rapid time-to-value**
Six-week project for actionable insights — fast
- › **Business-first focus**
Outcomes that drive enterprise value, not just IT efficiency
- › **Real-world experience**
Experts who have transformed business processes in complex environments

Why Rimini Street is the Smarter Choice

Rimini Street delivers more than recommendations — we deliver results. Our approach is built for speed, executive alignment and strategic impact, unlike traditional consulting models that focus on theory over execution.

Rimini Consult provides targeted, actionable guidance rooted in deep enterprise software expertise and a sharp understanding of business processes.

From transactional to strategic: empowering businesses to drive enterprise impact

Business leaders are expected to guide their organization, not just close the books. Rimini Street’s Business Process Optimization offering helps you meet that challenge head-on. In just six weeks, you'll receive a clear, actionable roadmap to optimize your business processes, cut costs and unlock strategic value.

Rimini Street has freed up my staff so we can focus more on the requirements of our customers, internal as well as external. We've taken on improvements like Warehouse Management, Concur's travel and expense management, and big projects like Salesforce. Before Rimini Street, we were not in a position to even look at those without going outside to expensive consultants."
